

PROFESSIONAL SUMMARY

Web Developer focused on building scalable, user-focused digital solutions beyond static websites.

Experienced in web applications, CMS platforms, and performance optimisation, with growing exposure to AI and automation workflows.

Currently developing spellacademy.com, an interactive EdTech platform combining frontend development, UX, and product thinking to solve real-world learning challenges.

CORE COMPETENCIES

Frontend: HTML5, CSS3, JavaScript, Responsive Design, UI/UX Principles.

CMS & Tools: WordPress, Elementor, Wix.

Backend & Data: Basic PHP, SQL, API Integration.

Other: Git (basic), SEO, Performance Optimisation, Digital Design, Web Security.

Emerging Skills: AI tools, Workflow Automation, Product Thinking.

Business: Team Collaboration, Communication, User Support & Training, Task Prioritisation, Stakeholder Interaction, Time Management.

PROFESSIONAL EXPERIENCE

Founder & Web Developer – spellacademy.com

 2024 – Present

Developing and scaling an interactive EdTech platform focused on improving spelling for ESL learners and exam candidates (IELTS, PTE, etc.).

Key Contributions:

- Built a **scalable, browser-based learning platform** using HTML, CSS, and JavaScript with integrated audio functionality.
- Designed platform architecture to support **future automation, content scaling, and user data tracking**.
- Developed **real-time feedback system** for spelling accuracy and performance tracking.
- Created a **user-focused interface** to improve engagement and learning outcomes.
- Applied SEO strategies to increase **organic traffic and discoverability**.
- Continuously improving the platform through **iteration, testing, and UX optimisation**.
- Exploring and implementing **automation workflows** for content generation and performance tracking.
- Managing full product lifecycle: **idea** → **development** → **launch** → **growth**.

Web Developer & Business Analyst - *Queensford College*; TAS, AU

 July 2023 – Oct 2023

- Contributed to a **document management system** web app, performing user testing, system validation, and software testing while developing **user manuals and support documentation** to improve usability and adoption.
- Provided technical and systems support while identifying opportunities to **improve workflow efficiency and reduce recurring issues**.
- Developed **Excel VBA automation scripts** to streamline repetitive administrative tasks.
- Gathered and analysed user requirements to support **practical system improvements**.
- Participated in Agile processes, contributing to **iterative development and continuous improvement**.

- Developed and maintained responsive websites using **Wix and WordPress CMS platforms**.
- Managed and updated content, ensuring **consistency, usability, and performance**.
- Managed **social media marketing** (SMM) campaigns to promote products and services, creating and scheduling content to improve engagement and online visibility.
- Applied SEO best practices to improve **search visibility and traffic**.
- Analysed and improved website structure and layout to enhance **user experience and engagement**.
- Provided technical support for hardware, software, and network-related issues.
- Created documentation to support **onboarding and internal workflows**.

Project Manager (University Project) - *UTAS*; TAS, AU

 **Jan 2022 – Dec 2022**

- Led development of a **database-driven educational web application (2D game)**.
- Implemented **SQL database integration** for managing user data.
- Applied **role-based access control** to improve system security and user management.
- Coordinated team tasks and ensured timely delivery through structured planning.
- Conducted testing and implemented improvements based on user and stakeholder feedback.
- Developed **user guides and onboarding documentation**.

EDUCATION & CERTIFICATIONS

Bachelor of ICT – University of Tasmania (2022).

ICT Professional Year Program – Australian College of Applied Professions (2023).

Certifications:

User Experience Certification – [Designcourse.com](https://www.designcourse.com) (2022)

Google IT Support Professional Certificate – [Coursera](https://www.coursera.org) (2024)

ITIL Foundation Certification – [ALISON](https://www.alison.ac.uk) (2024)

Digital Marketing Certification – [HubSpot Academy](https://www.hubspot.com/academy) (2024)

Google Analytics Certification – [Google](https://www.google.com/ads/certification) (2024)

ICT PROJECTS

- **SpellAcademy.com** – An EdTech platform designed to improve spelling through interactive, audio-driven learning – combining frontend development, UX design, and product thinking.
- **IT Asset Management System** – Designed a web-based tracking system to monitor IT hardware and maintenance schedules.
- **End-User IT Training Module** – Developed an interactive troubleshooting guide using HTML, CSS, and JavaScript.
- **Document Management System** – Built a secure document storage solution, improving data organization and security.
